## JOKES

How does a train  
avoid detection?  
It covers its tracks.

You can always tell when a train driver is  
stressed because they bite their rails.

A railroad conductor needs to make sure  
he doesn't go down the wrong track and  
lose his train of thought.

How do you make the locomotive  
Olympics? Train really hard.

Wow, you really have to hand it to fare  
inspectors. (That's it. That's the joke.)

What do you call a locomotive that keeps  
sneezing? Achoo choo train.
